How to install R and RStudio

If you are using Windows:

1. Download the binary setup file for R from the following link: https://cran.r-project.org/bin/windows/base/

2. Open the downloaded file and install R by following installation instructions.

3. Download the appropriate binary setup (see section: Installers for Supported Platforms) file for RStudio from the following link:
   https://www.rstudio.com/products/rstudio/download/

4. Open the downloaded file and install RStudio by following installation instructions.

5. Find RStudio shortcut in Start Menu and open RStudio by clicking on it.

If you are using Apple OS X:

1. Check OS X version: Choose "About This Mac" option from the Apple menu; the version number appears below the name.

2. Download the appropriate binary setup file for R from the following link: https://cran.r-project.org/bin/macosx/

3. Open the downloaded file and install R by following installation instructions.

4. Download the appropriate binary setup (see section: Installers for Supported Platforms) file for RStudio from the following link:
   https://www.rstudio.com/products/rstudio/download/

   Open the downloaded file and install RStudio by dragging the icon to Applications folder.

5. Find RStudio icon in Applications folder and open RStudio by clicking on it.

If you are using Linux: Well, you already know what to do :)
